

Vehicle list

Only for Axxid car seats with seat belt attachment and approved according to UN R129

Recommendation list for Axkid car seats with seat belt attachment (approved according to UN R129)

When it comes to installing a car seat in different cars - we always refer to the car's own manual. The car manual is the leading guideline and must always be followed. This car list does not limit or guarantee the fit of this child seat.

Our vehicle list are only meant as a guidance, since the amount of variety within one specific brand/model/year, is big. The vehicle list is a guide but with reservations for misspellings. Axkid disclaims all responsibility for any printing errors that may occur.

The child seat is a specific vehicle enhanced child restraint system. It is approved to regulation R129 series to use in vehicles fitted with 3-point belts approved to UN/ECE Regulation No. 16 or other equivalent standards.

The child seat is suitable for fixing into the seat positions of the cars listed below, providing approved 3-point belt and Lower tether Anchorage points are fitted and available. Seat positions in other cars may also be suitable to accept this child restraint. If in doubt, consult either the child restraint manufacturer or retailer, however we have not yet tested that combination of car and Axkid Seat.

For updated car list see: www.axkid.com/manual

If the support leg would be positioned on a storage compartment in front of the seat, you must follow the car manufacturer's instructions regarding how to handle the storage compartment. When the floor under the floor support is insufficient to hold the forces, you cannot use this child seat in this position of the car.

Axkid recommends installing this child seat in all vehicle seat positions which are intended to be used, and check installation, available space in the vehicle and position of the child, to verify if this child seat is acceptable for your situation.

Never install a child restraint in a passenger seat where an active airbag is fitted.

Car	Model	Year	Seat placement
